

CANISTER FILTERS

With such a vast number of Chinese filter suppliers available, ADL have carefully selected a filter manufacturer who is an OE supplier in their home market for some of the world's largest vehicle manufacturers. They are the only filter supplier in China to have ISO9001, QS9000 and VDA6.1 international quality certification.

With a strong environmental responsibility, wastage is kept to an absolute minimum and recycling is carried out wherever possible.

Manufacturing

- All filters are re-engineered from OEM master samples.
- All tooling is developed in-house.
- Manufacture is highly automated, with manual inspections carried out at every process.
- Very large factories capable of supplying large orders in an extensive choice of filter styles for different applications.
- After assembly and quality testing, the filters are then packaged with any relevant seals and boxed in your brand ready for direct shipping.

Quality Control

- Only the highest quality imported filter paper is used, with all filters being manufactured to our specifications.
- 100% visual inspection of individual filter components before and during assembly.
- 100% of filters are pressure tested after assembly for potential leaks.
- 100% of completed filters are carefully inspected before packing.
- High quality silk screen printing on the filter body with additional information added using inkjet if required.

From factory to National Distributor - tailored to your needs

- Filters can be printed with your brand, logo and part number
- Filters can be produced in any colour to match existing branding
- Zig-zag pleated paper is available in oil filters for extra filtration
- Quick development of new references
